

Les 100 meilleures universités mondiales en 2025

On s'accorde en général à dire qu'il existe environ 20 000 Universités dans le monde (source : European University Association). Un millier d'entre-elles sont considérées comme des opérateurs de recherche. Les 19 000 autres sont donc des Universités qui se consacrent essentiellement à la formation. Les dernières éditions des principaux classements universitaires internationaux placent 5 institutions françaises parmi les cent meilleures au monde qui sont les plus regardées (10% des Universités de recherche, 0,1% du total des Universités dans le monde). L'Université PSL se distingue tout particulièrement en étant présente dans chacun d'entre eux et en occupant la première place française dans quatre des cinq classements.

Signalons que l'Université PSL occupe également la deuxième place mondiale dans le classement THE Young University, consacré aux institutions de moins de cinquante ans.
